

Booking your *Flirt and Flutter* Individual Portrait

Location: For Individual Portraits such as for Business, Social Media or need Headshots I can go on location but definitely suggest using my studio as that's really what it's set up for- the lighting and backgrounds are controlled to make you look your best and really bring out the confidence, power, success and competence you want to bring across to your clients, contacts, or prospective love interests! If you are coming to the studio I generally book my sessions back to back and therefore will not be available for you to come in and get ready or begin the shoot before our allotted time.

Cancellations: I have a strict 24 hour cancellation policy, which if you booked through a group-buy site would have been included in the fine print of the deal, otherwise the deal is forfeited. In extreme weather conditions I may offer to reschedule the booking up to one hour before the shoot, unless you hear from me please show up at the agreed upon time.

Clothing/Appearance: There are no rules with clothing, I would suggest flat colors (or black and white if you prefer) and with no patterns. The clothes shouldn't be too loud or fashionable as time passes it will really date the photo. Unless included in your package, you should come to the studio with grooming completed, this includes: makeup, hair and nails done if necessary. Bring a few outfits, or shirts to bring diverse looks we can include in your package.

Additional Fees: There are no taxes that need to be paid on packages purchased; however as with many services industries such as beauticians, restaurants, etc, gratuities are customary and greatly appreciated.

Package Turn Around: If you have purchased a package through me, the contract I give to you will include the turnaround for the package. With the larger packages purchased from group buy sites the turn around to receive your package is approximately one month. I will choose the photos to be printed and burned on the CD however all photos included on the DVD will be in 300dpi high resolution and therefore able to be blown up for large prints at your leisure or with additional packages purchased from me.
